Summary sheet

Project Name	COVE SEED
Title of the document	Quality Assurance and monitoring plan
Deliverable	D6.1
Work Package	6
Programme	ERASMUS+
Coordinator	HU University of Applied Science Utrecht
Website	www.projectseed.eu
Author	Tess van der Hoek/Miriam Korstanje
Status	Final
Dissemination level	Public
Reviewed by	CLUBE and HU
Submission date	31 January 2023
Starting date	September 2022
Summary	D6.1 is the Quality Assurance and monitoring plan. In this document plan all activities, responsibilities and timelines of the quality assurance and monitoring of the COVE SEED are described.

COVE SEED

COVE SEED (Centre of Vocational Excellence – Sustainable Energy Education) is focused on providing excellent and innovative vocational education to become a fossil free energy continent. While challenges on the energy transition develop rapidly and technologies are constantly evolving, well-equipped students, professionals and suitable labor capacity are needed. SEED sees vocational education as an important driver for innovation and growth, agile in adapting to the labor market. The objectives of the project are therefore focused on innovative energy education that meets the needs of the labor market: a) Preparing learners, students and professionals with skills and competences for the future; b) Empowering regional innovation based on regional needs; c) Upscaling and promote work-based education, and will lead to d) the establishment of an international learning community and e) establishment of Centres of Vocational Excellence (COVES) in five regions. SEED consists of educational VET providers (EQF level 2-7), working professionals and policymakers from The Netherlands, Finland, Spain, Germany and Greece. The result is an international community on vocational excellence dedicated to sustainable energy. During the project the partners will co-create and increase not only regional cooperation, but also transnational cooperation. Good practices and innovative approaches for learning with impact will be exchanged and developed.

This project has received funding from the European Union's EACEA.A - Erasmus+, EU Solidarity Corps under grant agreement No 101056147.

1. Introduction to Quality Assurance

1.1 Quality Assurance in COVE SEED

To secure quality of the activities of the Centre of Vocational Excellence Sustainable Energy Education (COVE SEED), quality assurance (QA) is important. QA can be defined as part of the quality management that focuses on providing confidence of fulfilling the quality requirements of the project. All activities to ensure quality of COVE SEED will be described in the QA plan.

1.2 Dimensions of Quality Assurance

According to the European Quality Assurance in Vocational Education and Training (EQAVET) 'Quality Assurance in Centers of Vocational Excellence (CoVE)' report (EQAVET, 2021), QA concerns at least three dimensions: excellence in VET teaching and training at all levels (1), national collaboration with stakeholders to establish skills ecosystems and industrial ecosystems (2) and international (EU-wide) collaboration through CoVE networks (3). These three dimensions will be addressed in the QA plan.

1.3 Objective of the Quality Assurance plan

The objective of the QA plan is to ensure that the proposal as described in the Grant Agreement is implemented properly. Specifically, its purpose is to define the key steps and responsibilities for achieving the required quality levels in the COVE SEED. The QA plan comprises all planned and systemic activities within the quality system, ensuring the activities and deliverables of the project will meet the needs and expectations. In addition, the QA plan assures the existence and effectiveness of quality related processes and procedures. It safeguards the right mechanisms to ensure the expected levels of quality. Finally, it states the project's expectations and establishes the means by which the achievements of the intellectual outputs are to be assessed.

1.4 Set-up of Quality Assurance in SEED

Quality of the project activities in COVE SEED is a multi-dimensional concept which embraces all its functions and activities: teaching and programs, research, staffing, students, regional cooperation and COVE development, stakeholders, companies etc. The overall quality assurance of COVE SEED can be split up in internal quality assurance, external quality assurance and impact. It will take the form of internal self-evaluation and external review, conducted openly by independent specialists, based on the outcomes and progress of the project.

2. Quality Assurance organization in COVE SEED

2.1 Tasks and milestones in Work Package 6

Tasks in Work Package 6

In WP6, the following tasks are identified:

- T6.1 Process and quality monitoring strategy – task leader: PBT/Katapult
- T6.2 Monitoring of the activities in the quality assurance plan – task leader: PBT/Katapult
- T6.3 Consortium cross assessments – task leader: UOWM
- T6.4 External evaluation – task leader: PBT/Katapult
- T6.5 Cooperation agreements between European partners (MoU's) – task leader: UOWM
- T6.6 Implementation of the MoU formats – task leader: PBT/Katapult

Timeline of Quality Assurance tasks

An overview of the timeline of tasks in WP6 can be found in Table 1.

Table 1: Timeline of tasks (from project proposal).

lead partner	Workpackage/results	description	month	2022			2023				2024				2025				2026	
				Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2

PBT	task 6.1	Process and quality monitoring strategy	process and monitoring strategy																	
result	6.1.1	Develop draft process and quality monitoring strategy	quality indicators																	
result	6.1.2	Operationalization of quality indicators	quality indicators																	
result	6.1.3	Get feed back from partners	comments																	
result	6.1.4	Delivery of the quality assurance strategy as a plan	quality assurance plan																	
PBT	task 6.2	Monitoring of the activities in the quality assurance plan	monitoring of activities																	
result	6.2.1	Prepare monitoring tools for evaluating project progress on the indicators	tool on project progress																	
result	6.2.2	Prepare monitoring tools for evaluating the results on the indicators	tool on quality indicators																	
result	6.2.4	Prepare monitoring tools for AVG	tool on AVG																	
UOWM	task 6.3	Consortium cross assessments	cross assessments																	
result	6.3.1	Get cross assessment, define the results	directive																	
result	6.3.2	Organize cross assessment within partners	formats and guides																	
result	6.3.3	Conduct VET assessment (Self monitoring and feed monitoring)	assessments																	
PBT	task 6.4	External evaluation	external evaluation																	
result	6.4.1	Collect the project documents and outcomes	formats documents and results																	
result	6.4.2	Organize our review by experts	peer reviews																	
result	6.4.3	Communicate the recommendations	recommendations overview																	
UOWM	task 6.5	Cooperation agreements between European partners	cooperation agreements																	
result	6.5.1	Formats for regional cooperation and partnerships	formats CR																	
result	6.5.2	Formats for MOU's (to make exchange possible) teaching & learning	formats TL																	
result	6.5.3	Formats for governance models	formats GO																	
result	6.5.4	Implementations of the signing of cooperation agreements	cooperation agreements																	
PBT	task 6.6	Implementation of the formats	implementation of formats																	
result	6.6.1	Design and execute implementation workshop on the formats from 6.5 and support	workshop																	

Milestones in Work Package 6

There are two milestones in WP6:

- MS 6.1: Delivery of the quality assurance strategy in a plan, with commitment of the partners, presenting a process and quality monitoring strategy. In the plan the quality indicators are operationalized. Due: month 6 (30 November 2022).
- MS 6.2: Implementation workshop, to explain the use of the formats for regional cooperation and partnerships, the formats for MOU 's (to make exchange possible) in teaching and learning and the formats for governance models. Due: month 26 (31 July 2024).

2.2 Execution of Work Package 6: Quality Assurance and Evaluation

PBT/Katapult, with strong international experience on public-private partnership initiatives, is the Work Package (WP) leader on WP6: Quality Assurance and Evaluation. The University of Western Macedonia (UOWM) is the task leader of two tasks within WP6; the consortium cross assessments (T6.3) and the development of Memoranda of Understanding (MoU's) (T6.5).

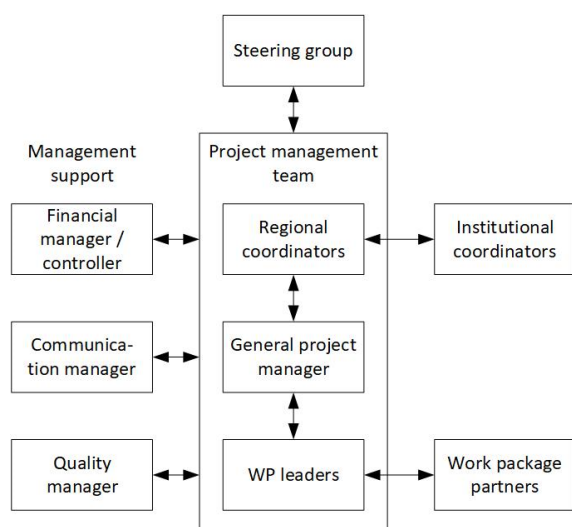

PBT/Katapult is task leader the other tasks; the process and quality monitoring strategy (T6.1), the monitoring of the activities in the quality assurance plan (T6.3), the external evaluation (by means of peer reviews) (T6.4) and the implementation of MoU formats (T6.6). PBT/Katapult and UOWM are working together closely to prepare the deliverables, complete the tasks and reach the milestones of WP6.

2.3 Roles and responsibilities in Quality Assurance

To achieve high quality of the objectives and results of COVE SEED, the roles and responsibilities are defined. An overview of the roles in the overall project management can be found in Figure 1. There are different responsibilities coming with different roles in the project concerning QA. The general project manager will supervise the overall quality of the project. The general project manager is also responsible for identifying, managing and controlling risks. The steering committee will advise and support the general project manager on quality issues and ensure that the outcomes of the project meet the required standards.

Figure 1: Overview of project management

The WP leaders are responsible for monitoring the quality of the activities in their WP. In WP6, the process and quality monitoring will be developed and the WP leaders will be provided with tools and formats to monitor the quality of the deliverables and activities in their work packages. The benchmarking of results over time with the performance indicators will take place in WP6. Regional performance indicators are developed and will be monitored by the regional coordinators (see chapter 3.3.3, table 4). On the other hand, transnational indicators are developed and will be monitored by the work package leaders of WP5 (accelerating SEED): Universitat Politècnica de València (UPV) and WP7 (dissemination): Cluster of Bioeconomy and Environment of Western Macedonia (CLUBE) (see chapter 3.3.3, table 5). Table 2 provides an overview of different roles and responsibilities within QA in SEED.

Table 2: Roles and responsibilities in Quality Assurance.

Role	Responsibilities
General project manager (lead partner): Hogeschool Utrecht	Supervise the overall quality of the project.
Steering committee	Advise and support the project manager on quality issues.
Work package leaders: WP1 Hogeschool Utrecht (HU) WP2 Turku University of Applied Sciences (TUAS) WP3 Hogeschool Utrecht (HU) WP4 Bochum University of Applied Sciences (BUAS) WP5 Universitat Politècnica de València (UPV) WP6 PBT/Katapult (PBT) WP7 Cluster of Bioeconomy and Environment of Western Macedonia (CLUBE)	Monitor tasks by using monitoring tools, leading to the results in their work packages. Ensure internal quality control within the WP tasks. Self-assessment of the quality indicators per WP (table 6).
WP6 leader: PBT/Katapult	Develop quality assurance plan with quality indicators and monitoring tools, coordinate quality monitoring, collect external evaluation documents and outcomes, organize peer reviews.
Task leader 6.3 Cross assessments and 6.5 Cooperation agreements: University of West Macedonia (UOWM)	Set-up and organize cross assessment, create formats for regional cooperation and partnerships and formats for Memoranda of Understanding (MoU's).
Regional coordinators: The Netherlands PBT Germany BUAS Finland TUAS Spain UPV Greece CLUBE	Monitor regional indicators (see chapter 3.3, table 4), assist in setting up the peer reviews in the region.
Work package leader WP5: UPV Work package leader WP7: CLUBE	Monitor the transnational indicators (see chapter 3.3, table 5).
Partner coordinators	Ensure the execution of the cross assessment of the deliverables assigned to the partner and timely delivery of the cross assessment report. Planning and deliverables in table 7.

3. Internal Quality Assurance

3.1 Three levels of internal Quality Assurance

The internal QA system consists of three levels:

- Outputs: deliverables /immediate results (direct results of the performed actions, in our direct control)
- Outcomes: intermediate to long term effects (combination of results and external circumstances conducting to some changes in the initial situation, we can influence but can't control; could be expected as well as unexpected)
- Impact: long term effects of the SEED project

SEED has realistic outputs and outcomes to be achieved through the 4 year duration of the project (June 2022 - May 2026). Establishing the outputs, outcomes and impact is meant to improve/adjust for better results at three levels, in accordance with the EQAVET quality assurance report:

- Project management level: improve efficiency and efficacy
- Target group level: improve relevance and coherence
- Regional: sustainability and impact

It combines quantitative and qualitative measurements for better understanding what is happening in the project and what can be improved.

3.2 The quality cycle in COVE SEED

EQAVET describes four different phases of quality assurance:

- Planning
- Implementation
- Evaluation
- Review

The planning phase is about participation of relevant stakeholders for identifying needs and setting goals and objectives, as well as establishment of mechanisms and procedures to identify the training needs of the labor market and society. This holds a strong link to work package 2 (WP2): Skills Analysis Fossil Free Energy. The needs of relevant stakeholders will be identified by analysis of necessary skills and development of training tools for green skills, digital skills and inclusive team skills.

The planning phase is followed by the implementation phase, where continuous development of teachers' competences, partnerships between teachers and trainers, promotion of innovation in teaching and learning methods take place, on national and international level. This is in line with the CoVE dimension of establishing excellence in teaching and learning. This will be addressed in work package 3 (WP3): Regional Innovation and Skills Ecosystems, work package 4 (WP4): Regional Good Practices on Teaching & Learning (TL), Cooperation & Partnership (CP) and Governance and work package 5 (WP5): Accelerating SEED. In WP3, regional innovation is empowered based on regional needs, by reinforcing the connections within the regions. Also, five regional CoVE's will be established and extended (one in each region). In WP4, good practices will be made explicit and enriched with experience value to promote attractiveness of work-based education, which relates to a coherent set of activities and measurement criteria on regional impact and skills. WP5 addresses the establishment

of an international learning community, with shared standards, approaches, tools, experiences and lessons learned to effectuate knowledge exchange and mobility of staff and students.

In the evaluation phase, the processes and results of education and training, including learner satisfaction as well as staff performance and satisfaction are being evaluated. This entails including various stakeholders at national and international level in evaluation processes and having effective feedback loops and tracking systems in place. The review phase is described as the phase where the definition and use of procedures, mechanisms and instruments for undertaking reviews and improve the quality of provision at all levels takes place. Work package 6 (WP6): Quality Assurance and Evaluation addresses both of these phases. In WP6, a process and quality monitoring strategy will be made and the activities in the quality assurance plan will be monitored.

Throughout the four phases, work package 1 (WP1): Project Management and Coordination and work package 7 (WP7): Dissemination and exploitation are of great importance for general project management and sharing the importance of the project with the rest of the world. Successfully carrying out all of the work packages is essential for completing the quality cycle and therefore for ensuring quality of the project.

Figure 2 The EQAVET quality cycle (planning, implementation, evaluation, review).

3.3 Outputs and Outcomes in COVE SEED

3.3.1 Quality Assurance and monitoring of Work Packages

Per work package, qualitative and quantitative indicators for the outputs and outcomes are defined together with the WP leaders (see table 3). Key performance indicators (KPI's) have been added where relevant. Based on this table, the self-assessment format has been developed (see attachment 1: Template self-assessment tool). Monitoring tools have been selected for the outputs and outcomes and formats will be developed for those as well in close consultation with the WP leaders. The self-assessment forms will be combined in one document to be assessed by the general project manager.

3.3.2 Work Package quality indicators

Table 3 provides an overview of the quality indicators that were defined together with the WP leaders. Monitoring the quality indicators will help ensuring the quality of the deliverables in the WPs. An overview of the deliverables, quality indicators, monitoring tools, who is responsible for it and deadlines can be found in Table 3.

Table 3: WP quality indicators.

Deliverables	Quantitative indicator	Qualitative indicator	Monitoring tool	Outcome	Responsible	Deadline deliverable	Monitoring report
1.1 Transnational meetings	<ul style="list-style-type: none"> # Attendees # Meetings 	<ul style="list-style-type: none"> Satisfaction rate/relevance 	<ul style="list-style-type: none"> Attendance list Evaluation form 	TBD	TUAS	2,6,10,14,18,22,26,29,34,38,42,45	Self-assessment by WP1 lead partner HU

3.3.3 Quality Assurance and monitoring on regional and transnational level

On a regional level, the progress of CoVE development will be assessed using the models that will be developed in WP3. In these models, indicators will be developed including KPI's to assess the maturity of the regional CoVE's. This will be the basis for peer reviews between the regions, learning from each other and further developing the tool to measure the maturity of the regional cooperation. The CoVE development will be endorsed by signing Memoranda of Understanding (MoU) in each region.

A model will be developed for the MoU based on the regional needs and ecosystem (T6.5). In the MoU, the regional partners describe the way of working together in the CoVE including e.g. objectives, activities, governance, financing. The maturity of the CoVE in the region at the midterm (2 years) will be used to define the starting point of cooperation. Together with the region, the ambition for the maturity after 4 years will be established. This will be evaluated in the peer reviews at the end of the project. Workshops for implementation of the MoU's in the regions will be developed and executed (T6.6). The regional indicators (table 4) will be monitored and reported every year in a summary report.

Table 4: Indicators on regional level and their monitoring tools.

Indicators on regional level	Monitoring instruments	Lead partners	Deadlines monitoring
Regional COVES, measurement on progress in 4 years	Maturity models from WP3 Peer reviews MOU in WP6	HU PBT & regional coordinators (PBT, BUAS, TUAS, UPV, CLUBE) UOWM	Peer reviews: 1-6-2024 1-6-2026 1-9-2024
Number of new finance and governance models are developed, deployed, and validated.	Evaluation of Good practices GO23 and GO25 in WP4 and WP5	BUAS, UPV	1-6-2023 1-6-2024 1-6-2025 1-6-2026
The number of activities developed within regional skills ecosystems and shared with partners	WP7 dissemination log	CLUBE	1-6-2023 1-6-2024 1-6-2025 1-6-2026

The number of participants in regional activities	WP7 dissemination log	CLUBE	1-6-2023 1-6-2024 1-6-2025 1-6-2026
---------------------------------------------------	-----------------------	-------	----------------------------------------------

On the transnational level, the development of the learning community will be assessed leading to the impact of the project for the SEED consortium and the skills ecosystems. The transnational indicators will be monitored and reported every year in a summary report. An overview of the transnational indicators can be found in Table 5.

Table 5: Indicators on transnational level and their monitoring tools.

Indicators on transnational level	Monitoring instruments	Responsible partners	Deadlines
Number of institutions, finally connected to the learning community	WP5 monitoring and WP7 dissemination log	UPV, CLUBE	1-6-2023 1-6-2024 1-6-2025 1-6-2026
Number of participants on the events organized in SEED	WP7 dissemination log	CLUBE	1-6-2023 1-6-2024 1-6-2025 1-6-2026
Number of outcomes, used by others than the SEED consortium to reinforce regional cooperation	WP5 monitoring and WP7 dissemination log	UPV, CLUBE	1-6-2023 1-6-2024 1-6-2025 1-6-2026

4. Monitoring tools for internal Quality Assurance

The following monitoring tools are foreseen in the project:

- 4.1 Data and analysis
- 4.2 Evaluation form/questionnaires
- 4.3 Self-assessment
- 4.4 Cross-assessment (by partners)
- 4.5 Peer review - measurement of progress CoVE's (maturity model)

4.1 Data and analysis

The quantitative indicators will be monitored by obtaining data and analysis. For meetings and activities, the dissemination log of WP7 will be used. The format of the form is included in attachment 2: Format data and analysis form. WP leaders are responsible for gathering the information and submitting in the form.

4.2 Questionnaires/evaluation forms

Qualitative indicators will be monitored by using evaluation forms in Microsoft forms. In attachment 3: Format of evaluation form, a format is included for measuring satisfaction by participants in a meeting. This form can be adjusted together with WP leaders and good practices to make sure they match with the objectives and target groups. The result of the questionnaires will be filed in the folder of the deliverable.

4.3 Self-assessment of Work Packages

To evaluate the quality of outputs and the outcomes of the work packages, the monitoring results of the indicators will be reported every six months in the self-assessment forms (see attachment 1 for the template). Based on the indicators per work package (table 3) a format has been developed to be filled in by the work package leaders. These reports will form the overview of the quality monitoring results per work package and report on necessary adjustments after evaluation. The self-assessment forms will be combined in one report twice per year according to the deadlines in Table 6.

Table 6: Self-assessment of WP quality indicators.

WP	Monitoring instrument	Lead partners	Deadlines self-assessment	Approval by the project management team
WP _{1,2,3,4,5,6,7}	Self-assessment (template see attachment 3)	WP leaders: WP ₁ HU WP ₂ TUAS WP ₃ HU WP ₄ BUAS WP ₅ UPV WP ₆ PBT WP ₇ CLUBE	24-1-2023 15-6-2023 15-12-2023 15-6-2024 15-12-2024 15-6-2025 15-12-2025 15-6-2026	31-1-2023 1-7-2023 1-1-2024 1-7-2024 1-1-2025 1-7-2025 1-1-2026 1-7-2026

4.4 Set-up of Consortium Cross assessments (UOWM)

A tool that will be used to ensure internal quality of deliverables are Consortium Cross assessments. The delivered reports of COVE SEED will be reviewed by other partners than the partner that is in charge of the deliverable. For the deliverables of COVE SEED that have been selected, an overview of the cross assessments and timings can be found in Table 7. In attachment 4 the Cross Assessment Template and instructions can be found.

Table 7: Cross assessment timeline.

Deliverable	Description	Lead Partner	Cross assessment by partner(s)	Deliverable ready for cross-assessment	Cross assessment form sent to UOWM	Cross Assessment report to WP Leader	Final Deliverable by WP Leader	Deadline

*The dates are indicative and are subject to changes in case of WPs extension.

The steps for the SEED cross assessment process are as follows:

- The lead partner of the deliverable prepares the draft deliverable ready for cross assessment (6 weeks before the deadline), while:
- Inputs/reviews are expected by all partners that are included in the specific deliverable preparation.
- Cross assessment form is provided by 2 responsible partners to UoWM (5 weeks before the deadline) in the following e-mails: akrestou@uowm.gr, kostas@kkc.gr.
- UoMW provides the cross assessment report to the lead leader (4 weeks before the deadline).
- Lead partner prepares the final deliverable (3 weeks before the deadline) and after approval of the project management team, the deliverable will be submitted to the EU portal.

Cross assessment responsible partners and deadlines per deliverable, are indicated in table 7. The feedback will be prepared in a cross assessment form template provided by UoWM and by each responsible partner per cross assessed deliverable (attachment 4: Cross Assessment Template).

The assessment report by UoWM based on cross assessment feedback by partners will be delivered as indicated in the proposal (see attachment 5: Cross Assessment Report Template).

Every year the cross-assessment reports are combined and evaluated. In Deliverable 6.2 the evaluation of the cross-assessments will be combined with the external reviews. The timing of these combined reports can be found in table 8.

4.5 Peer Reviews in COVE SEED

PBT/Katapult has developed an approach for [peer reviews](#). Together with the WP leader of WP3, this will be evaluated and adjusted to include the maturity model. Regional CoVE's will be paired to execute the peer review and to assess the maturity. This is specially to gain information on success of

reaching the original aim of the project, i.e., outcome, outputs, and impacts. The peer reviews will be organised in year 2 (light version to understand the model) and 4 (full version including stakeholder interviews). Timing to be aligned with project meetings.

4.6 Summary of internal Quality Assurance reports

The monitoring data will be combined in reports as described before: self-assessments of all WP, cross-assessment of designated deliverables, peer reviews and reporting on regional and transnational indicators. Deadlines of these reports are presented in Table 8.

Table 8: Overview of internal QA reports and timing.

Deliverable	QA monitoring	Lead partners input	Final Draft	Reviewed by	Final Deadline
	WP self-assessment 1	WP leaders	24-1-2023	Project management team	31-1-2023
	WP self-assessment 2	WP leaders	15-6-2023	Project management team	1-7-2023

	Reporting on regional and transnational Indicators 3	PBT Input: CLUBE, UPV, BUAS, regions	1-5-2025	HU	1-6-2025
	Reporting on regional and transnational Indicators 4	PBT Input: CLUBE, UPV, BUAS, regions	1-5-2026	HU	1-6-2026

5. External Quality Assurance

Two international independent external expert peer reviews will be used to get an independent judgement of project implementation including financial and quality assessment. The advantage of

including external evaluation is objectivity from outside the partnership and added expertise. The evaluation of the external evaluator focuses on assessing relevance, coherence, impact, effectiveness, efficiency, and sustainability of the project. Members of the steering committee will be given full access to project results, will be regularly invited to project meetings/activities and will formulate recommendations based on the expert reviews. The steering committee will meet on annual basis. The independent external financial quality assessment will be carried out at mid-term and at the end of the project. An expert committee will be established for evaluation of the outputs, outcome and impact of SEED. The results of the external quality assurance will be part of the deliverable D6.2 together with the cross-assessment reports and the deadline can be found in the below Table 9.

Table 9: Deadlines of external quality assurance reports.

Deliverable	QA monitoring	Lead partners	Final Draft	Reviewed by	Final Deadline
D6.2	External expert review 1	PBT	tbd	Lead partner HU	1-4-2024
D6.2	External expert review 2	PBT	tbd	Lead partner HU	1-4-2026
D6.2	External financial review 1	PBT	tbd	Lead partner HU	1-4-2024
D6.2	External financial review 2	PBT	tbd	Lead partner HU	1-4-2026

6. Impact of the project

To establish the impact of the project, an impact evaluation strategy will be developed together with the work package leaders of WP5 and WP7. The Katapult method for measuring impact will be used as a starting point. This is a combination of quantitative data and qualitative information based on questionnaires and interviews of the regional partners and skills ecosystem. Example of the impact measurement of the Dutch PPP network can be found [here](#). A separate plan will be prepared for this together with the project management team.

7. Conclusion and Recommendations

This Quality Assurance and monitoring plan is a living document. All project partners have a role in ensuring the high quality of the project results (outputs, outcomes and impact). The monitoring tools and the procedures will be evaluated throughout the project and adjusted where needed to make sure the quality assurance process is efficient and effective.

Attachment 1: Template self-assessment tool

Quality Assurance and monitoring of Work Packages

The internal Quality Assurance (QA) system of SEED consists of three levels:

- Outputs: deliverables/immediate results (direct results of the performed actions, in our direct control)
- Outcomes: intermediate to long term effects (combination of results and external circumstances leading to some changes in the initial situation we can influence but can't control; could be expected as well as unexpected)
- Impact: long term effects of the SEED project

The Work Packages (WP) will be evaluated on the output and outcome level. As defined in the Quality Assurance and monitoring plan, self-assessment of the WP quality indicators will be filled in by the WP leaders every six months.

Work package ...: ...

Quality Indicators and Monitoring Tools

Deliverable	Quantitative indicator	Qualitative indicator	Monitoring tool	Outcome

Output measurements

No.	Indicator	Value planned	Value achieved	Source of information/ verification	Comments - contexts and proposed adjustments, if needed

Outcome measurements

No.	Indicator	Value planned	Value achieved	Source of information/ verification	Comments - contexts and proposed adjustments, if needed

Attachment 2: Format data and analysis form (dissemination log) (WP7)Dissemination

Partner	Dissemination activity name	What: type of dissemination activity (Please choose one option from the drop-down list)	Who: target audience reached (Please choose one option from the drop-down list)	Why: description of the objective(s) with reference to a specific project output (max. 200 characters)	Status (Please choose one option from the drop-down list)
---------	-----------------------------	--------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------	--------------------------------------------------------------

Instructions: dissemination activities involve actions through: Conferences, Education and training events, Meetings, Clustering Activities, Collaboration with EU-funded projects, Other scientific collaboration, Other scientific cooperation, Other

Communication

Partner	Communication activity name (Short label, as described in the Communication, Dissemination, Exploitation plan)	Description	Who: target audience reached (Please choose one option from the drop-down list)	How? Communication Channel (Please choose one option from the drop-down list)	Status (Please choose one option from the drop-down list)	Date	Outcome (It would be very specific Key Performance Indicators)	Link (use hyper-links)* -If there is no link, please provide supporting documents.
---------	-------------------------------------------------------------------------------------------------------------------	-------------	------------------------------------------------------------------------------------	----------------------------------------------------------------------------------	--------------------------------------------------------------	------	-------------------------------------------------------------------	---------------------------------------------------------------------------------------

Instructions: communication activities involve actions through a(n): Event (conference/meeting/workshop/etc.), Exhibition, Interview, Media article, Newsletter, Other, Press Release, Print Materials (brochure/leaflet/posters/stickers/banners/etc.), Social media, TV/Radio Campaign, Videos, Website. For the communication activities it is important to include a link to the documents on Sharepoint/Teams belonging to this activity.

Events and trainings

Participant name	Name	Type	Area	City, Country	Duration (days)	Male	Female	Non-binary	Total Attendees
------------------	------	------	------	---------------	-----------------	------	--------	------------	-----------------

Internal meetings

Partner	Meeting name	Audience	Description	Date	Total Attendees	Link (use hyper-links)* *If there is no link, please provide supporting documents.
---------	--------------	----------	-------------	------	-----------------	---------------------------------------------------------------------------------------

Attachment 3: Format of evaluation form

An example of an evaluation form of a project meeting. Feel free to adjust the scale and questions to your own needs.

Evaluation form

What is your role in the project?

Project manager/teacher/other/researcher

Evaluation scale: 1 – Strongly disagree, 2 – Disagree, 3 – Agree, 4 – Strongly agree, 5 – Not attended

Practical organization of the meeting

- The quality of the practical information before the meeting was good
- The quality of the practical information during the meeting was good
- The quality of location, food and meeting rooms during the meeting was good
- Practical assistance from ... staff during your stay was good

Open question: Please, add any comments or suggestions you may have regarding the practical organization of the meeting

Content

The kick off meeting had several goals. We ask you to reflect on those goals and rate them from strongly disagree to strongly agree

- I got a good understanding of the project
- I got to know the other partners and regions
- The meeting updated me on the progress of each work package
- The meeting provided insightful workshops on skills development, scans and gap analysis
- There was a good balance between visiting labs (excursions) and presentations
- There was a good balance between program activities and free time
- The program was interactive
- The duration of the project meeting was good
- Open question: Which program element stood out for you? Why?
- Open question: Did the project meeting meet your expectations? Why (not)?
- Open question: What are your needs for the next project meeting?

Attachment 4: Cross Assessment Template
